1. Applicant's arguments filed August 26, 2003 have been fully considered but they are not persuasive. While applicants feel Kolter et al does not teach each and every element of amended claim 1, the reference need only show an amount within applicants' range of 20 to 80 percent, which it does in showing the lower limit of 20 percent for the binder. Claim 1 of Kolter et al shows elements a) polyvinyl acetate and b) N-vinylpyrrolidone may constitute the entire binder in a ratio of 6:4 to 9:1 and the upper limit of 20 percent binder clearly reads on applicants' claim 1.

While applicants feel Ortega does not show the same formulated mixture of polyvinylpyrrolidone and polyvinyl acetate as applicants, how a composition is made is not a basis for determining patentability of composition claims. The reference shows the same components as applicants.
